To Get Rid of Frown and Squint Wrinkles

(From Household Friend)

Do you know what your frowning habit makes you look like? Observe the different expressions due to frowns in the faces of other people. The scowl, given by two deep lines between the eyes; the worried look, resulting from a furrowed forehead; the sly expression, induced by squinting and causing tiny lines to radiate from the corner of the eye—all these, and more, are the result of frowns.

To obliterate frowning wrinkles—and all others—use a wash lotion made by dissolving an ounce of powdered saxolite in a half plut of witch hazel. This immediately tightens the skin, affecting even the deepest wrinkles and crow's feet. It "firms up" not only the skin, but underlying tissue. There's no better treatment for paunch-like cheeks and neck. Any druggist can supply the ingredients. (From Household Friend)
